DWeb Principles

01. Technology for human agency

02. Distributed benefits

03. Mutual respect

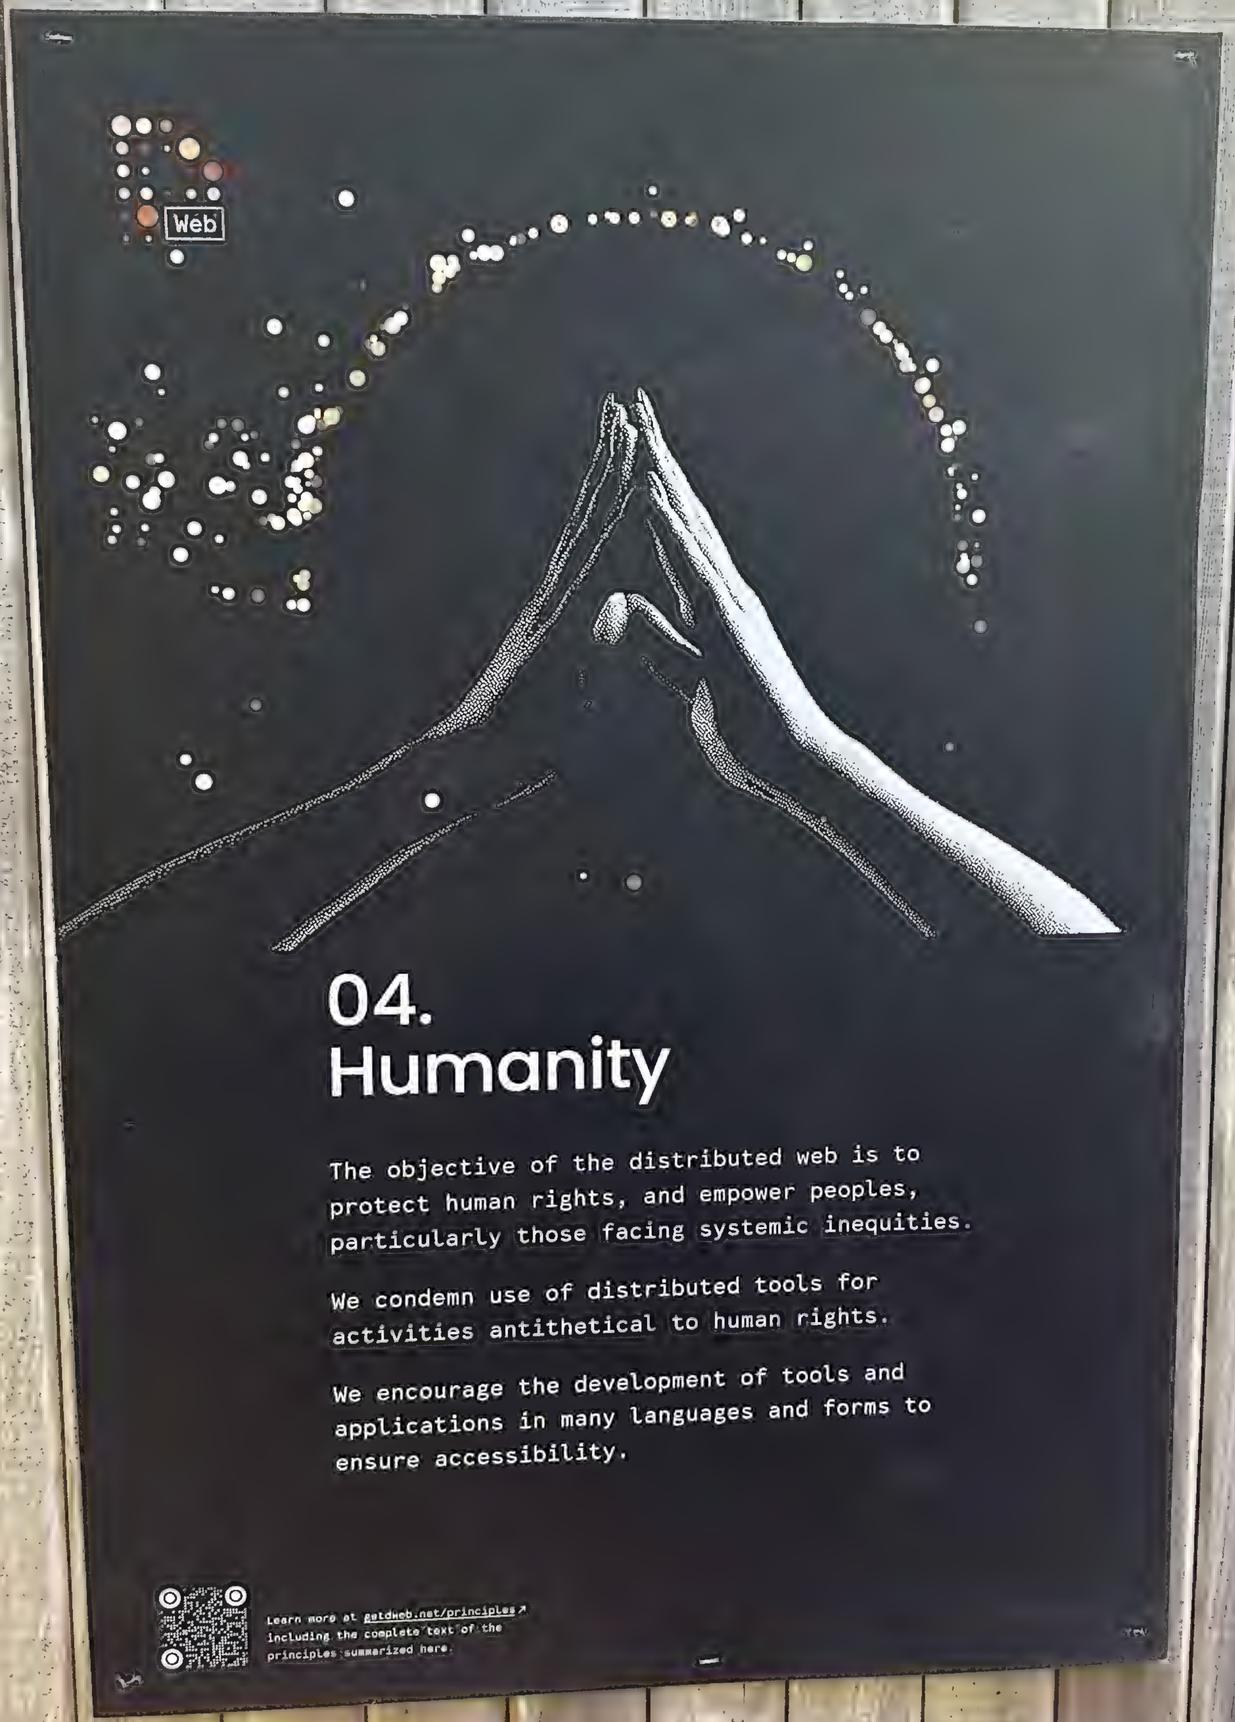
04. Humanity

05. Ecological imperatives

05. Ecological imperatives

We aim to minimize ecological harm and avoid technologies that worsen environmental health.

We work towards reducing energy consumption and device resource requirements, by allowing repair, recycling, and recovery.



04.
Humanity

The objective of the distributed web is to protect human rights, and empower peoples, particularly those facing systemic inequities.

We condemn use of distributed tools for activities antithetical to human rights.

We encourage the development of tools and applications in many languages and forms to ensure accessibility.

Learn more at getdweb.net/principles↗ including the complete text of the principles summarized here.

Web
03.
Mutual
respect
We support clear codes of conduct to ensure respectful behavior and accountability.
We stand for open and transparency in a manner that actively pursues equity and mutual trust.
Learn more at gotdweb.net/principles↗ including the complete text of the principles summarized here.

Web

02.
Distributed benefits

The DWeb is most beneficial when rewards and recognition are shared.

Learn more at getdweb.net/principles↗ including the complete text of the principles summarized here.

01. Technology for human agency

We stand for technology that enables people to be the primary beneficiaries of the web, upholding their privacy, security and self-determination.

We urge coexistence and interoperability of multiple technologies, value open source code as a fundamental building block, and aim for peer-to-peer relationships.

We minimize surveillance and manipulation of people's behaviors while optimizing for social benefits and empowerment.

Learn more at getdweb.net/principles↗ including the complete text of the principles summarized here.

DWeb Principles

These define the values of a decentralized web based on enabling agency of all peoples — the basis for behavioral norms and mutual accountability to bring about a more just and equitable world.

These stand alongside other sets of principles that share or expand upon these values, and originate from those involved with and convened by the Internet Archive's work on the decentralized web. This is a summarized version of the principles.

Learn more at getdweb.net/principles↗ including the complete text of the principles summarized here.

Redefining ~~re-naming~~ "DWeb"

plug + play infrastructure
(website, funding, design?)

Rooted in place first + foremost

flow of information + people

Meet before/after other events
(Rightscon, hacker camps, etc)

Building up infrastructure
⇒ Celebration
people can come + go during longer term

Outreach + community cultivation
(who wouldn't know about it otherwise?)

supporting existing projects where they are

Connecting overlapping + similar projects under a tent to collaborate

Virtual meetups in different languages

organizers as Dweb "pollinators"

Convening the conveners

Dweb toolkit
as a service bank/ repository
